# CVE Number, Cumulative

# CVE Number, Yearly

# CNAPulse

Monitoring CVE Numbering Authority publishing activity and trends

📅 Report Generated: January 22, 2026 at 11:11 AM UTC 📊 CNAs Analyzed: 520

Monitoring Window  
**30 Days**

Baseline Period  
**12 Months**

Total CNAs  
**520**

Growth  
**17**

Normal  
**84**

Declining  
**268**

Inactive  
**151**

## CNA Status Types

**Growth**

**>250% of baseline (+150% growth).** Publishing activity significantly above historical average.

**Normal**

**50-250% of baseline.** Publishing activity within expected range based on historical patterns.

**Declining**

**<50% of baseline (-50% decline).** Publishing activity significantly below historical average.

**Inactive**

**No CVEs published.** CNA has not published any CVEs in the dataset. May be newly registered or completely inactive.

# Beyond **CVE**: Reconciling Overlap, Gaps, and Granularity Across Vulnerability Data Sources

Andrey Lukashenkov © 2026

This repository contains a collection of data retrieval and analysis scripts designed to interface with the Vulners database and official CVE/OSV sources. Developed for the GVIP Summit, these tools automate downloading large-scale vulnerability datasets and provide deep analytical insights into trends, scoring discrepancies, and data quality.

# Thank you!
